What Aurora IQ offers

Image quality

- **50 degrees field of view** combined with **non-mydriatic operation** allow a detailed examination and ease of use in various use cases.
- **New high contrast optical design** helps to detect small early phase retinal changes.

Intelligent features

- **Autofocus and autoexposure** allow quick usage of the camera without any setting modifications in various use cases.
- **Integrated image quality analysis** guides first time users to acquire successful images and therefore minimizes training time.
- **Pin code protection** can be used for ensuring data safety.

Connectivity

- **WLAN and USB connections for image transfer** and various ways of handling image data are supported by the camera.
- **Integrated Cloud connection** allows sending images to an optional AI service for image analysis.
