

Optomed Lumo

OPTOMED

The new Optomed Lumo fundus camera has become the best choice among veterinary ophthalmologists for documenting animal retinas.

This state-of-the-art device impresses particularly with its lightning-fast and smart autofocus, advanced optics, and its ability to produce crystal-clear images of the retina effortlessly and without pupil dilation.

**Come and see the
new Optomed Lumo
only in EyeVision's
booth!**

Welcome!

- **Smart Autofocus:** Sharp images quickly even for restless patients.
- **Lightweight & Portable:** Easy to use in the clinic and the field for animals of all sizes.
- **No Dilation Drops Needed:** Speeds up examinations.
- **Top-Tier Image Quality:** 12-megapixel sensor reveals even minor changes.
- **Wireless Transfer:** Sends images directly to the patient management system.
- **Large Touchscreen:** Images can be reviewed immediately on the device.
